

O.K. Engineers: Brass Lamp Components Exporter

Delivering micron-level accuracy and superior craftsmanship to industries across the world.

Made with GAMMA

Who We Are: A Legacy of Excellence

For over six decades, O.K. Engineers has stood at the forefront of the brass component manufacturing industry, blending traditional family values with modern engineering precision.

60+ Years of Heritage

Now in our 4th generation of family leadership, we bring over 60 years of deep industry expertise to every component we manufacture.

ISO 9001:2015 Certified

As a certified manufacturer and exporter, we adhere to strict international standards for brass and copper alloy components.

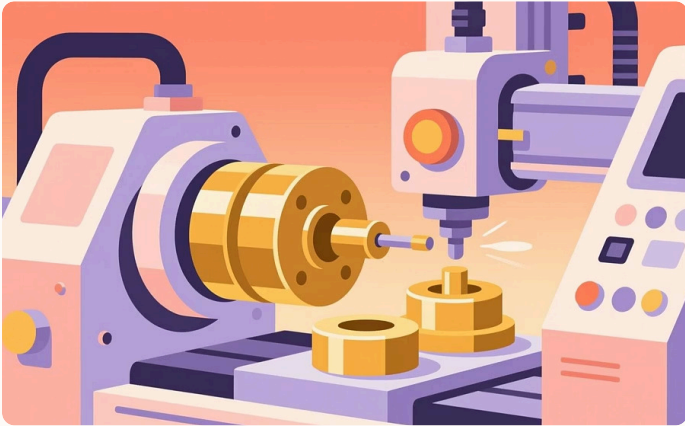

Global Footprint

Our precision parts power industries across the USA, Germany, Spain, France, Russia, the UK, and beyond.

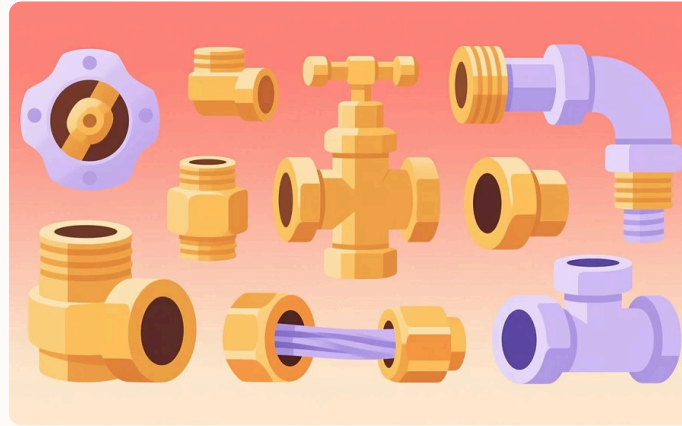

Precision Engineering & Advanced Manufacturing

Our facility is equipped to handle the most demanding specifications, utilizing state-of-the-art technology to produce seamless, high-tolerance components.

Advanced CNC Machining

We utilize cutting-edge CNC technology to deliver complex turned parts with micron-level accuracy, ensuring perfect fit and function.

Diverse Product Portfolio

From cable glands and lamp parts to intricate automotive components and plumbing fittings, our catalog covers a vast range of industrial needs.

Critical Reliability

Our seamless construction and high-tolerance manufacturing ensure reliability in critical applications where failure is not an option.

Quality & Customization That Sets Us Apart

At O.K. Engineers, quality isn't just a checkpoint; it's our culture. We understand that every micron matters.

Flawless Inspection

We implement rigorous quality control protocols with 100% inspection rates to guarantee that every part leaving our floor is flawless.

Tailored Customization

Whether you need low-volume prototypes or high-volume production runs, we manufacture strictly according to your custom drawings and specifications.

Innovation & Durability

We are committed to continuous innovation, ensuring our parts meet international compliance standards for durability and performance.

Global Impact & Future Vision

We are proud to be a trusted partner to diverse sectors, continuously investing in our technology and workforce to meet the evolving demands of the global market.

Automotive
Precision parts for vehicle systems.

High-Tech
Micron-accurate parts for tech hardware.

Electrical
Components for conductivity and safety.

Sanitary
Durable fittings for plumbing systems.

Medical
High-grade alloys for critical devices.

O.K. Engineers: Your one-stop solution for premium brass precision components worldwide.
