

# Ok Engineers: Precision Brass Fittings Manufacturers

Leading UK manufacturer of high-quality brass fittings and components for industrial applications

# Expertise & Craftsmanship

## Decades of Manufacturing Excellence

With extensive experience in producing high-quality brass fittings, we serve the plumbing, HVAC, and electrical sectors with unwavering commitment to quality.

## Precision Engineering

We specialise in custom component housings and glands manufactured to tight tolerances, ensuring exceptional durability and reliability in demanding applications.

## Advanced Manufacturing

Our state-of-the-art processes and quality control systems guarantee precision and consistent quality across every product we manufacture.

# Product Range & Applications

## Component Housings

Protect and support mechanical parts in sensors, valves, and regulators with precision-engineered brass housings designed for optimal performance.

## Glands

Secure cable connections in lighting, telecommunications, and power equipment whilst aiding certification compliance with robust, reliable gland solutions.

## Diverse Fittings

Comprehensive range including compression fittings, adaptors, elbows, caps, and valves engineered for diverse industrial applications.

# Quality & Certification Commitment

Our dedication to excellence is demonstrated through rigorous standards and comprehensive certification, ensuring every brass fitting meets the highest specifications.

## ISO 9001

Quality Management Systems certification ensuring consistent excellence in manufacturing processes and product delivery

## ISO 14001

Environmental Management certification demonstrating our commitment to sustainable manufacturing practices

## ISO 45001

Health & Safety certification protecting our team and ensuring safe, compliant operations

Our rigorous quality control procedures ensure every fitting undergoes thorough inspection before delivery. We maintain expertise in eco-friendly brass materials and provide comprehensive support for clients' certification requirements.

# Why Choose Ok Engineers?

01

## Tailored Solutions

Expert consultation and bespoke engineering to meet your unique project requirements with precision-crafted brass components

02

## Reliable UK Manufacturing

Fast turnaround times with nationwide delivery, backed by decades of British manufacturing excellence and dependability

03

## Innovation & Quality

Continuous commitment to technological advancement, superior quality standards, and complete customer satisfaction in every brass fitting we produce

📄 **Ready to discuss your brass fitting requirements?** Contact Ok Engineers today for expert consultation and discover how our precision manufacturing can support your project success.
