Why Choose OK Engineers?

Material Integrity

Manufactured from premium-grade brass, ensuring corrosion resistance, machinability, and long service life in high-pressure environments.

Precision Machining

Tight tolerances and consistent thread profiles guarantee leak-free connections across every batch and order.

Custom Capability

We support OEM specifications, custom geometries, and bespoke finishes to meet your exact application requirements.

Scalable Supply

From prototype runs to high-volume production, our facility is equipped to deliver on time, every time.

Our Product Range

Garden Hose Fittings

Standard and quick-connect fittings for domestic and commercial irrigation systems.

Industrial Hose Fittings

Heavy-duty fittings designed for hydraulic, pneumatic, and fluid transfer applications.

Adapters & Couplings

A full range of adapters, elbows, tees, and couplings in multiple thread standards.

Built to Specification

Every fitting is produced to meet international standards including BSP, NPT, and metric threads. Whether you need catalog parts or fully custom-engineered components, OK Engineers delivers with full traceability and quality documentation.

- 📄 OEM partnerships and bulk procurement enquiries are welcomed. Contact us for technical drawings and quotations.

Partner With OK Engineers

From initial enquiry to final delivery, we are committed to being a reliable, quality-driven partner for your hose fitting requirements.

Request a Quote

Share your specifications and receive a competitive quotation with lead times and pricing.
